

## Computer Project for the Week of October 6<sup>th</sup> 8<sup>th</sup> Grade

The San Fernando Valley traps the pollution created in Los Angeles. A warm layer of air is trapped between dense, cooler layers above and below, and between the sea and the mountains. It holds chemicals that sunlight turns to smog, which can irritate the lungs and eyes.

1. Research the history and future of air pollution and control. Write two paragraphs.
2. List five things you can do now to reduce air pollution.
3. List five things you will be able to do when you are 25 years old.
