

Sixth Grade Science Computer Project

Going to the beach is a great way to spend a summer day. But what if the beach was gone the next time you visited? Some beaches are slowly being washed away!

Write a personal narrative about the effects of beach erosion and ways to protect beaches. To do so, you will research beach erosion and beach protection. Here are some questions to guide your research:

- Why are beaches important?
- What are some causes of beach erosion?
- How can beach erosion be prevented?
- What are some ways beaches can be restored?
